Because Agnitio responds continually to changing market conditions, this document should not be interpreted as a commitment on the part of Agnitio. Agnitio cannot guarantee the accuracy of any information presented after the date of publication.

What's New in this Release

New features:

- **Configurable Contacts view.** You are now able to configure which heading and subheadings should appear in the Contacts view
- **New Synchronisation-menu.** The Sync-menu has been revised, for a much more straight-forward functionality. For the normal day-to-day use, synchronization is now a one-tap operation
- **Contacts filtered by selected Account.** If an account is selected during call creation, the Contacts list will by default display the list of contacts which appear under the selected account.
- **Synchronisation log.** The synchronization view displays a log of all changes made during synchronization
- **iPlanner settings moved to iPad settings.** The iPlanner Settings menu has been moved to the iPad Settings menu, so that changes can be made to memory warnings without requiring the user to access the iPlanner
- **iPlanner reset function.** A reset iPlanner functionality has been added in the iPad settings menu, which makes it possible to clear the installation without having to download and reinstall it
- **Updated graphics.** The iPlanner graphics have received a facelift

Optimizations and Improvements:

- The search functionality for the Contacts view has been extended to include all fields
- It is now possible to call external apps from within an iPlanner presentation
- Post-calls can now be deleted
- Call History now displays both Call Objective and Next Call
