

Agnitio iPlanner Light Version 1.11 - Release Notes

Submitted to App Store on Monday, 11th February 2013

Notice

The content in this document represents the current view of Agnitio as of the date of publication. Because Agnitio responds continually to changing market conditions, this document should not be interpreted as a commitment on the part of Agnitio. Agnitio cannot guarantee the accuracy of any information presented after the date of publication.

What's New in this Release

New features:

- **New Synchronisation-menu.** The Sync-menu has been revised, for a much more straight-forward functionality. For the normal day-to-day use, synchronization is now a one-tap operation
- **Synchronisation log.** The synchronization view displays a log of all changes made during synchronization
- **iPlanner Light settings moved to iPad settings.** The iPlanner Light Settings menu has been moved to the iPad Settings menu, so that changes can be made to memory warnings without requiring the user to access the iPlanner Light
- **iPlanner Light reset function.** A reset iPlanner Light functionality has been added in the iPad settings menu, which makes it possible to clear the installation without having to download and reinstall it
- **Updated graphics.** The iPlanner Light graphics have received a facelift

Optimizations and Improvements:

- It is now possible to call external apps from within an iPlanner Light presentation
